## Work Experience

### MERN Stack Developer @ MNB Soft Solution Pvt. Ltd.

July 2023 - Present // Noida, India

- Develop, maintain and ship high-quality and robust production code for a diverse array of client and internal projects by leveraging the power of MERN stack.
- Collaborate with designers, project managers to transform creative concept into production realities.
- Implemented seamless chat functionality using Socket.io to facilitate communication among administrators, employees and clients within the MNB Project Management system.
- Design and implement RESTful APIs, optimizing data retrieval and manipulation through well-structured endpoints and query parameters.

## Projects

### TaskFlier

*A Single Unified Platform for all the Management Needs*

Developed a comprehensive SaaS project management platform with a multi-tenant architecture for client isolation. The platform utilizes role-based access control with dedicated admin, employee, and client dashboards.

#### Key Features:

**Project & Task Management:** Streamlined project tracking with task creation, assignment, and progress monitoring.

**Communication & Collaboration:** Integrated chat system for real-time communication.

**Performance Tracking:** Employee performance reporting.

**HR Management:** Built-in HRMS functionalities for attendance, leaves and pay slip.

**Tools and Tech:** MERN, JWT, Mongoose, Bootstrap, Socket.io, Multer

### MNB Mart

*A Reliable Online Shopping Platform*

Developed the scalable backend for MNB Mart, a feature-rich multi-vendor Ecommerce platform. Built with Node.js and MongoDB for performance and flexibility. Integrated secure payments (PhonePe) and implemented a real-time order tracking system for enhanced customer experience. MNB Mart boasts a user-friendly interface with comprehensive features, ensuring a seamless and secure shopping experience for customers.

**Tools and Tech:** NodeJS, MongoDB JWT, Mongoose, Multer
